

COMPANY PROFILE

We provide civil and structural engineering consultancy services to clients involved in building and construction. Our particular specialisms include building and infrastructure projects utilising structural steelwork, reinforced concrete, pre-cast concrete and composite forms of construction. We have experience across most market sectors including the rail sector.

We are an IT focussed organisation making extensive use of computers, electronic communications and the Internet. We use advanced structural analysis and design software.

Recent projects we have worked on in the UK include Thameslink 2000 and the Chapelfield retail development in Norwich. Overseas, we have been involved in high rise projects in Dubai and the World Trade Center project in Bahrain.

The services we offer to our clients include:

- Site Evaluation and Feasibility Studies
- Concept Design and Scheme Design
- Value Engineering Studies
- Structural Analysis and Detailed Design
- Management of Outsourced Design Packages
- Design Checking and Peer Review
- Independent Consultant
- Specialist Assistance

The skills we offer to our clients include:

- Advanced Computer Modelling of Structures
- Knowledge of Building Materials and Methods
- Design Optimisation
- Construction Detailing
- Drafting of Specifications
- Preparation of Working Sketches and Drawings

Specialisms include:

- High Rise Construction
- Tubular Structures
- Fatigue Design
- Steelwork Connections
- Composite Construction

Our aim is to secure repeat business from Clients by providing added value services in a responsive, friendly manner.
